

Procurement | Distribution | Maintenance | Replacement

Overview

At AGT, our logistics and product support efforts are designed to sustain the combat readiness and maintain the operational readiness of our Soldiers. Our goal is to help ensure that America's Warfighters -- and those supporting them -- receive what they need when they need it.

No matter whether it is a new product, a replacement part, or an obsolete item, AGT experts can manage the acquisition process or product life cycle while improving readiness and sustainment. Flexibility and process improvement are key to an integrated logistics approach to keep costs minimized and service maximized. And it is what gives AGT the edge when it comes to material readiness.

Company Information

DUNS Number: 122712180
Cage Code: 3DY06
ISO 9001:2008
AS9100
Tribally owned 8(a), HUBZone, SDB
Certified Business
Charter Corporation of the Mississippi Band of Choctaw Indians, founded 2001

Current logistics efforts include:

- On-site logistics for an Army organization at the Nation's largest military installation; AGT receives, stocks and manages inventory for the Redstone Arsenal-managed organization. As part of this effort, field engineering, including flight tracking and vehicle recovery, is performed.
Procurement and distribution of motor vehicles to be modified for tests for an Army organization
Logistics management for robotics sustainment for an Army organization; AGT manages production logistics along with replacement parts procurement, kitting, and distribution services.
Third-party logistics (3PL) for an Air base; AGT maintains a catalog of parts and products for both business supplies and aviation vehicle parts.
Procure obsolete and/or discontinued parts for an Air base
Cabling and wiring harness kitting for a variety of government and commercial vehicles; AGT provides engineering design, parts procurement, fabrication, warehousing and distribution. Kitting and packaging for assembled products also is available.
